## For Healthy Oral Flora & Dental Care

Formulated lozenges with Dentalac®, probiotic lactic acid bacteria, and Lactoferrin CLN®

### Unique composition of highly purified Lactoferrin CLN® and specific lactic acid bacteria

Promotes a healthy, balanced oral flora and bacterial balance

- 500 million probiotic lactic acid bacteria
- Highly purified Lactoferrin CLN®
- Protection against cavities, periodontitis, and gum inflammation
- Reduction of plaque
- Pleasant mouthfeel with mint flavor

## What is Floral?

### Dentists say 'Health starts in the mouth'.

Even with exemplary oral hygiene, our mouth is densely populated with bacteria - the oral flora. This is not only important for the mouth and teeth, but also influences our overall health. When harmful bacteria take over, the oral flora ecosystem becomes unbalanced. Bad breath, plaque, gum inflammation, cavities, and chronic inflammation can occur. Over time, chronic inflammation can also become a threat to our internal organs. A healthy oral flora, on the other hand, acts as a natural defense against invaders, and a beautiful smile is like a business card.

**FLORAL** oral and dental care lozenges, with their unique composition of highly purified Lactoferrin CLN® and specially cultivated lactic acid bacteria AB-Dentalac®, promote a healthy, balanced oral flora and help prevent the unpleasant consequences of bacterial imbalance. AB-DENTALAC® protects the oral cavity from cavities, gum problems, and bad breath, and is the perfect complement to daily tooth brushing and flossing. It also restores the oral microbiome after oral surgical procedures and reduces inflammation and pain.

## Why Floral from artgerecht?

- Promotes a healthy oral flora
- Supplies the oral cavity with probiotic bacteria
- Protects against cavities, gingivitis, and periodontitis
- Reduces plaque
- Supports the reduction of bad breath
- Refreshing mint flavor for a pleasant mouthfeel
- Mint flavor extracted from natural raw materials
- Unique composition with highly pure Lactoferrin CLN®
- With patented Lactobacillus-Strains (AB-Dentalac®)

## Scientific background to Floral?

FLORAL is a unique combination that we developed in collaboration with our research partner, and it contains AB-Dentalac® as well as Lactoferrin CLN®.

Lactoferrin is a multifunctional iron-binding immune protein, which is extracted and purified in Europe's most modern processing facility. Thanks to this gentle and complex process, Lactoferrin CLN® has proven to have the highest lactoferrin content, purity, and bioactivity.

AB-Dentalac® is a combination of patented strains *Lactobacillus brevis* CECT 7478 and *Lactobacillus plantarum* CECT 7481. AB-Dentalac® is a specialized probiotic that supports oral health by promoting a healthy bacterial flora. It helps reduce cavities, gum disease, and bad breath by inhibiting the growth of harmful bacteria. The formula contains strains of beneficial bacteria such as *Lactobacillus*, which are known for their impact on oral hygiene. AB-Dentalac® is ideal for those who want to naturally complement their dental care.

## Frequently Asked Questions

### What is special about FLORAL?

The unique combination of AB-Dentalac® (two specially cultivated, patented strains of lactic acid bacteria) combined with Lactoferrin CLN®, a naturally occurring multifunctional immune protein with numerous bioactive properties and functions.

### What is AB-Dentalac®?

AB-Dentalac® works by using probiotic bacterial strains, such as *Lactobacillus*, that promote the balance of the natural oral flora. These beneficial bacteria fight harmful microorganisms that cause cavities, gum disease, and bad breath. By reducing the growth of unwanted bacteria, AB-Dentalac® supports oral health and contributes to improved tooth and gum care.

### Can AB-Dentalac® accompany periodontal treatments?

Yes, AB-Dentalac® can help with periodontitis by providing probiotic bacteria that inhibit the growth of harmful bacteria in the mouth. Periodontitis is often caused by an overgrowth of harmful bacteria that attack the gum tissue. The beneficial bacteria in AB-Dentalac® help restore the balance of the oral flora, promote a healthy inflammatory response, and strengthen the gums' defense mechanisms. As a result, it can reduce the progression of periodontitis and improve overall oral health.

### Is FLORAL suitable for daily use and can it be used in combination with other oral hygiene products?

Yes, FLORAL is safe for daily use and can be a part of your daily oral hygiene routine. Yes, it can be used alongside toothpaste, mouthwash, and dental floss to optimize oral health. The application can be long-term as needed to promote oral health and provide protection against cavities and gum disease.

### Is FLORAL suitable for those with histamine intolerance?

Lactobacillus plantarum and brevis in FLORAL are not histamine-producing bacterial strains.

## Ingredients

Sorbitol, Lactobacillus, hydrolyzed guar, Lactoferrin CLN®, flavor, and hydrogenated cottonseed oil.

<b>Content</b>	<b>Per Tablet</b>
Lactobacillus	125.00 mg
Lactoferrin CLN®	50.00 mg
Natural Mint Flavor	

## Recommended intake

Allow one lozenge to dissolve slowly in your mouth after dental hygiene in the morning (do not swallow whole), unless otherwise recommended by your dentist. We recommend taking it for at least four weeks. If necessary, the intake can be extended or repeated.

## Additional information

- SKU/MPN: 10203
- Content: 30 lozenges
- Net filling quantity: 28 g
- EAN/GTIN: 4260656120385
- PZN (DE): 17592878
- PZN (AT): 5561594
- Customs tariff number: 21069092
- Origin: ES
- Version: 18.12.2025
